Explain "Yes" answers on the following page.
Circle questions you don't know the answers to.

	Y	N
1) Has a doctor ever denied or restricted your participation in sports for any reason?	<input type="checkbox"/>	<input type="checkbox"/>
2) Do you have an ongoing medical conditional (like diabetes or asthma)?	<input type="checkbox"/>	<input type="checkbox"/>
3) Are you currently taking any prescription or nonprescription (over-the-counter) medicines or supplements? (Please specify): _____	<input type="checkbox"/>	<input type="checkbox"/>
4) Do you have allergies to medicines, pollens, foods or stringing insects? (Please specify): _____	<input type="checkbox"/>	<input type="checkbox"/>
5) Does your heart race or skip beats during exercise?	<input type="checkbox"/>	<input type="checkbox"/>
6) Has a doctor ever told you that you have (check all that apply): <input type="checkbox"/> High Blood Pressure <input type="checkbox"/> A Heart Murmur <input type="checkbox"/> High Cholesterol <input type="checkbox"/> A Heart Infection	<input type="checkbox"/>	<input type="checkbox"/>
7) Have you ever spent the night in a hospital?	<input type="checkbox"/>	<input type="checkbox"/>
8) Have you ever had surgery?	<input type="checkbox"/>	<input type="checkbox"/>
9) Have you ever had an injury (sprain, muscle/ligament tear, tendinitis, etc.) that caused you to miss a practice or game? (If yes, check affected area in the box below in question 11)	<input type="checkbox"/>	<input type="checkbox"/>
10) Have you had any broken/fractured bones or dislocated joints? (If yes, check affected area in the box below in question 11):	<input type="checkbox"/>	<input type="checkbox"/>
11) Have you had a bone/joint injury that required X-rays, MRI, CT, surgery, injections, rehabilitation physical therapy, a brace, a cast or crutches? (If yes, check affected area in the box below):	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Head <input type="checkbox"/> Neck <input type="checkbox"/> Shoulder <input type="checkbox"/> Upper Arm <input type="checkbox"/> Elbow <input type="checkbox"/> Forearm		
<input type="checkbox"/> Hand/Fingers <input type="checkbox"/> Chest <input type="checkbox"/> Upper Back <input type="checkbox"/> Lower Back <input type="checkbox"/> Hip <input type="checkbox"/> Thigh		
<input type="checkbox"/> Knee <input type="checkbox"/> Calf/Shin <input type="checkbox"/> Ankle <input type="checkbox"/> Foot/Toes		

	Y	N
12) Have you ever had a stress fracture?	<input type="checkbox"/>	<input type="checkbox"/>
13) Have you ever been told that you have, or have you had an X-ray for atlantoaxial (neck) instability?	<input type="checkbox"/>	<input type="checkbox"/>
14) Do you regularly use a brace or assistive device?	<input type="checkbox"/>	<input type="checkbox"/>
15) Has a doctor told you that you have asthma or allergies?	<input type="checkbox"/>	<input type="checkbox"/>
16) Do you cough, wheeze or have difficulty breathing during or after exercise?	<input type="checkbox"/>	<input type="checkbox"/>
17) Is there anyone in your family who has asthma?	<input type="checkbox"/>	<input type="checkbox"/>
18) Have you ever used an inhaler or taken asthma medication?	<input type="checkbox"/>	<input type="checkbox"/>
19) Were you born without, are you missing, or do you have a non-functioning kidney, eye, testicle or any other organ?	<input type="checkbox"/>	<input type="checkbox"/>
20) Have you had infectious mononucleosis (mono) within the last month?	<input type="checkbox"/>	<input type="checkbox"/>
21) Do you have any rashes, pressure sores or other skin problems?	<input type="checkbox"/>	<input type="checkbox"/>
22) Have you had a herpes skin infection?	<input type="checkbox"/>	<input type="checkbox"/>
23) Have you ever had an injury to your face, head, skull or brain (including a concussion, confusion, memory loss or headache from a hit to your head, having your "bell rung" or getting "dinged")?	<input type="checkbox"/>	<input type="checkbox"/>
24) Have you ever had a seizure?	<input type="checkbox"/>	<input type="checkbox"/>
25) Have you ever had numbness, tingling or weakness in your arms or legs after being hit, falling, stingers or burners?	<input type="checkbox"/>	<input type="checkbox"/>
26) While exercising in the heat, do you have severe muscle cramps or become ill?	<input type="checkbox"/>	<input type="checkbox"/>
27) Has a doctor told you that you or someone in your family has sickle cell trait or sickle cell disease?	<input type="checkbox"/>	<input type="checkbox"/>
28) Have you ever been tested for sickle cell trait?	<input type="checkbox"/>	<input type="checkbox"/>
29) Have you had any problems with your eyes or vision?	<input type="checkbox"/>	<input type="checkbox"/>
30) Do you wear glasses or contact lenses?	<input type="checkbox"/>	<input type="checkbox"/>
31) Do you wear protective eyewear, such as goggles or a face shield?	<input type="checkbox"/>	<input type="checkbox"/>
32) Are you happy with your weight?	<input type="checkbox"/>	<input type="checkbox"/>
33) Are you trying to gain or lose weight?	<input type="checkbox"/>	<input type="checkbox"/>
34) Has anyone recommended you change your weight or eating habits?	<input type="checkbox"/>	<input type="checkbox"/>
35) Do you limit or carefully control what you eat?	<input type="checkbox"/>	<input type="checkbox"/>
36) Do you have any concerns that you would like to discuss with a doctor?	<input type="checkbox"/>	<input type="checkbox"/>

Females Only

COVID-19...

	Y	N
1) Has your child been diagnosed with COVID-19?	<input type="checkbox"/>	<input type="checkbox"/>
1a) If yes, is your child still having symptoms from their COVID-19 infection?	<input type="checkbox"/>	<input type="checkbox"/>
2) Was your child hospitalized as a result for complications of COVID-19?	<input type="checkbox"/>	<input type="checkbox"/>
3) Has your child been diagnosed with Multi-Inflammatory Syndrome in Children (MIS-C)?	<input type="checkbox"/>	<input type="checkbox"/>
4) Did your child have any special tests ordered for their heart or lungs or were referred to a heart specialist (cardiologist) to be cleared to return to sports?	<input type="checkbox"/>	<input type="checkbox"/>
5) Has your child returned back to full participation in sports?	<input type="checkbox"/>	<input type="checkbox"/>
6) Has your child had direct or known exposure to someone diagnosed with COVID-19 in the past 3 months?	<input type="checkbox"/>	<input type="checkbox"/>
6a) Was your child tested for COVID-19?	<input type="checkbox"/>	<input type="checkbox"/>
7) Did your child receive the COVID-19 vaccine?	<input type="checkbox"/>	<input type="checkbox"/>
7a) What was the manufacturer of the vaccine? _____		
7b) Date of vaccination(s) _____		

Explain "Yes" Answers Here

Patient Health Questionnaire Version 4 (PHQ-4)

Over the last two weeks, how often have you been bothered by any of the following problems? (circle responses)

	Not At All	Several Days	Over Half The Days	Nearly Every Day
Feeling nervous, anxious, or on edge	0	1	2	3
Not being able to stop or control worrying	0	1	2	3
Little interest or pleasure in doing things	0	1	2	3
Feeling down, depressed, or hopeless	0	1	2	3

(A sum of ≥ 3 is considered positive on either subscale [questions 1 and 2, or questions 3 and 4] for screening purposes.)

If you score a sum of 3 or greater on either questions 1 and 2, or 3 and 4, you may have anxiety or depression that is affecting you more than normal. In this case, it is recommended that you talk to a trusted health care provider such as your primary care physician, your athletic trainer at school, or a counselor at school. If there is not someone you feel comfortable talking to or you are interested in learning more to help yourself or a friend, please use the resources provided below.

Arizona Interscholastic Association, Inc. Mild Traumatic Brain Injury (MTBI) / Concussion Annual Statement and Acknowledgement Form

I, _____ (student), acknowledge that I have to be an active participant in my own health and have the direct responsibility for reporting all of my injuries and illnesses to the school staff (e.g., coaches, team physicians, athletic training staff). I further recognize that my physical condition is dependent upon providing an accurate medical history and a full disclosure of any symptoms, complaints, prior injuries and/or disabilities experienced before, during or after athletic activities.

By signing below, I acknowledge:

- My institution has provided me with specific educational materials including the CDC Concussion fact sheet (<http://www.cdc.gov/concussion/HeadsUp/youth.html>) on what a concussion is and has given me an opportunity to ask questions.
- I have fully disclosed to the staff any prior medical conditions and will also disclose any future conditions.
- There is a possibility that participation in my sport may result in a head injury and/or concussion. In rare cases, these concussions can cause permanent brain damage, and even death.
- A concussion is a brain injury, which I am responsible for reporting to the team physician or athletic trainer.
- A concussion can affect my ability to perform everyday activities, and affect my reaction time, balance, sleep, and classroom performance.
- Some of the symptoms of concussion may be noticed right away while other symptoms can show up hours or days after the injury.
- If I suspect a teammate has a concussion, I am responsible for reporting the injury to the school staff.
- I will not return to play in a game or practice if I have received a blow to the head or body that results in concussion related symptoms.
- I will not return to play in a game or practice until my symptoms have resolved AND I have written clearance to do so by a qualified health care professional.
- Following concussion the brain needs time to heal and you are much more likely to have a repeat concussion or further damage if you return to play before your symptoms resolve.

Based on the incidence of concussion as published by the CDC the following sports have been identified as high risk for concussion; baseball, basketball, diving, football, pole vaulting, soccer, softball, spiritline and wrestling.

I represent and certify that I and my parent/guardian have read the entirety of this document and fully understand the contents, consequences and implications of signing this document and that I agree to be bound by this document.

Parent or legal guardian must print and sign name below and indicate date signed:

Print Name: _____ Signature: _____ Date: _____

2022-23 CONSENT TO TREAT FORM

Parental consent for minor athletes is generally required for sports medicine services, defined as services including, but not limited to, evaluation, diagnosis, first aid and emergency care, stabilization, treatment, rehabilitation and referral of injuries and illnesses, along with decisions on return to play after injury or illness. Occasionally, those minor athletes require sports medicine services before, during and after their participation in sport-related activities, and under circumstances in which a parent or legal guardian is not immediately available to provide consent pertaining to the specific condition affecting the athlete. In such instances it may be imperative to the health and safety of those athletes that sports medicine services necessary to prevent harm be provided immediately, and not be withheld or delayed because of problems obtaining consent of a parent/guardian.

Accordingly, as a member of the Arizona Interscholastic Association (AIA), _____ (name of school or district) requires as a pre-condition of participation in interscholastic activities, that a parent/guardian provide written consent to the rendering of necessary sports medicine services to their minor athlete by a qualified medical provider (QMP) employed or otherwise designated by the school/district/AIA, to the extent the QMP deems necessary to prevent harm to the student-athlete. It is understood that a QMP may be an athletic trainer, physician, physician assistant or nurse practitioner licensed by the state of Arizona (or the state in which the student-athlete is located at the time the injury/illness occurs), and who is acting in accordance with the scope of practice under their designated state license and any other requirement imposed by Arizona law. In emergency situations, the QMP may also be a certified paramedic or emergency medical technician, but only for the purpose of providing emergency care and transport as designate

PLEASE PRINT LEGIBLY OR TYPE

"I, _____, the undersigned, am the parent/legal guardian of, _____ a minor and student-athlete at _____ (name of school or district) who intends to participate in interscholastic sports and/or activities.

I understand that the school/district/AIA employs or designates QMP's (as defined above) to provide sports medicine services (as also defined above) to the school's interscholastic athletes before, during or after sport-related activities, and that on certain occasions there are sport-related activities conducted away from the school/district facilities during which other QMP's are responsible for providing such sports medicine services. I hereby give consent to any such QMP to provide any such sports medicine services to the above-named minor. The QMP may make decisions on return to play in accordance with the defined scope of practice under the designated state license, except as otherwise limited by Arizona law. I also understand that documentation pertaining to any sports medicine services provided to the above-named minor, may be maintained by the QMP. I hereby authorize the QMP who provides such services to the above-named minor to disclose such information about the athlete's injury/illness, assessment, condition, treatment, rehabilitation and return to play status to those who, in the professional judgment of the QMP, are required to have such information in order to assure optimum treatment for and recovery from the injury/illness, and to protect the health and safety of the minor. I understand such disclosures may be made to above-named minor's coaches, athletic director, school nurse, any classroom teacher required to provide academic accommodation to assure the student-athlete's recovery and safe return to activity, and any treating QMP.

If the parent believes that the minor is in need of further treatment or rehabilitation services for the injury/illness, the minor may be treated by the physician or provider of his/her choice. I understand, however, that all decisions regarding same day return to activity following injury/illness shall be made by the QMP employed/designated by the school/district/AIA.

Date: _____ Signature: _____

A FACT SHEET FOR High School Parents

This sheet has information to help protect your teens from concussion or other serious brain injury.

What is a concussion?

A concussion is a type of traumatic brain injury—or TBI—caused by a bump, blow, or jolt to the head or by a hit to the body that causes the head and brain to move quickly back and forth. This fast movement can cause the brain to bounce around or twist in the skull, creating chemical changes in the brain and sometimes stretching and damaging the brain cells.

How can I help keep my teens safe?

Sports are a great way for teens to stay healthy and can help them do well in school. To help lower your teens' chances of getting a concussion or other serious brain injury, you should:

- Help create a culture of safety for the team.
 - > Work with their coach to teach ways to lower the chances of getting a concussion.
 - > Emphasize the importance of reporting concussions and taking time to recover from one.
 - > Ensure that they follow their coach's rules for safety and the rules of the sport.
 - > Tell your teens that you expect them to practice good sportsmanship at all time.
- When appropriate for the sport or activity, teach your teens that they must wear a helmet to lower the chances of the most serious types of brain or head injury. There is no "concussion-proof" helmet. Even with a helmet, it is important for teens to avoid hits to the head.

Talk with your teens about concussion.

Tell them to report their concussion symptoms to you and their coach right away.

How can I spot a possible concussion?

Teens who show or report one or more of the signs and symptoms listed below—or simply say they just "don't feel right" after a bump, blow, or jolt to the head or body—may have a concussion or other serious brain injury.

Signs observed by parents

- Appears dazed or stunned
- Is confused about events
- Answers questions slowly
- Repeats questions
- Can't recall events *prior* to the hit, bump, or fall
- Can't recall events *after* the hit, bump, or fall
- Loses consciousness (even briefly)
- Shows behavior or personality changes
- Forgets an instruction or assignment

Symptoms reported by teens

- Headache or "pressure" in head
- Nausea or vomiting
- Balance problems or dizziness
- Blurry or double vision
- Sensitivity to light or noise
- Feeling sluggish, hazy, foggy, or groggy
- Difficulty concentrating or remembering
- Just not "feeling right" or "feeling down"

CONCUSSIONS AFFECT EACH TEEN DIFFERENTLY.

Although most teens with a concussion feel better within a couple of weeks, some will have symptoms for months or longer. Talk with your teens' healthcare provider if their concussion symptoms do not go away or if they get worse after they return to their regular activities. **Be sure to offer support during their recovery and allow them to stay connected with friends and others.**

What are some more serious danger signs to look out for?

In rare cases, a dangerous collection of blood (hematoma) may form on the brain after a bump, blow, or jolt to the head or body, and can squeeze the brain against the skull. Call 9-1-1 or take your teen to the emergency department right away if after a bump, blow, or jolt to the head or body he or she has one or more of these danger signs:

- One pupil (the black part in the middle of the eye) larger than the other
- Drowsiness or cannot be awakened
- A headache that gets worse and does not go away
- Weakness, numbness, or decreased coordination
- Repeated vomiting or nausea
- Slurred speech
- Convulsions or seizures
- Difficulty recognizing people or places
- Increasing confusion, restlessness, or agitation
- Unusual behavior
- Loss of consciousness (even a brief loss of consciousness should be taken seriously)

What should I do if my teen has a possible concussion?

As a parent, if you think your teen may have a concussion, you should:

1. Remove your teen from play.
2. Keep your teen out of play the day of the injury. Your teen should be seen by a healthcare provider and only return to play with permission from a healthcare provider who is experienced in evaluating for concussion.
3. Ask your teen's healthcare provider for written instructions on helping your teen return to school. You can give the instructions to your teen's school nurse and teacher(s) and return-to-play instructions to the coach and/or athletic trainer.

Do not try to judge the severity of the injury yourself. Only a healthcare provider should assess a teen for a possible concussion. You may not know how serious the concussion is at first, and some symptoms may not show up for hours or days. A teen's return to school and sports should be a gradual process that is carefully managed and monitored by a healthcare provider.

Teens who continue to play while having concussion symptoms or who return to play too soon—while the brain is still healing—have a greater chance of getting another concussion. A repeat concussion that occurs while the brain is still healing from the first injury can be very serious and can affect a teen for a lifetime. It can even be fatal.

AIA POSITION STATEMENT

SUPPLEMENTS, DRUGS AND PERFORMANCE ENHANCING SUBSTANCES

PURPOSE OF FORM: All AIA Member schools are required to ANNUALLY communicate this AIA Position Statement on the use of supplements, drugs and performance enhancing substances to every participant in interscholastic activities. (See Article 14, Section 13, Paragraph 2).

The Arizona Interscholastic Association (AIA) views sport, and the participation of student-athletes in sports, as an activity that enhances the student-athlete's well-being by providing an environment and stimulus that promotes growth and development along a healthy and ethically based path.

- It is the position of the AIA that a balanced diet, providing sufficient calories, is optimal for meeting the nutritional needs of the growing student-athlete.
- It is the position of the AIA that nutritional supplements are rarely, if ever, needed to replace a healthy diet.
- Nutritional supplement use for specific medical conditions may be given individual consideration.
- The AIA is strongly opposed to "doping", defined as those substances and procedures listed on the World Anti-Doping Agency's Prohibited List (www.wada-ama.org).
- It is the position of the AIA that there is no place for the use of recreational drugs, alcohol or tobacco (e-cigarettes) in the lifestyle of the student-athlete. The legal consequences for the use of these products by a student-athlete are supported by the AIA.

In pursuit of **Victory with Honor**, the AIA promotes the use of exercise and sport as a mechanism to establish current fitness and long-term healthy lifetime behaviors. It is the position of the AIA that the student-athlete, who consumes a balanced diet, practices sport frequently and consistently, and perseveres in the face of challenges, can meet these goals.
